

Introducing Version 6.0

**Christie
Pandoras Box**

Christie Pandoras Box Version 6.0 and Widget Designer

Christie® Pandoras Box is the powerful turnkey solution that perfectly unites state-of-the-art rendering technology with complete media and show control. Totally customizable, the intuitive design can be set up specifically to your needs. And now, with the introduction of Pandoras Box Version 6.0, you have even more power at your fingertips.

Also updated is Widget Designer, the powerful interactive application builder that gives you complete control over Christie Pandoras Box or other third-party devices.

What's new?

Christie Pandoras Box

- Multi-user mode for simultaneous timeline editing, warping and content manipulation
- Editable live canvas for masking and painting of any kind within Pandoras Box
- Editable meshes for on-the-fly FFD and vertex-warping directly within Pandoras Box
- UV map adjustment directly within the preview
- Pixel-based user interface for easier content handling
- 2D focused user interface enables easier content interaction without interfering with the third dimension - ideal for image compositing and timeline programming
- 3D render engine access can be enabled with a single click in the preview window
- Preview interaction allows all new modes and parameters to be used directly in the render engine

Widget Designer

- Completely redesigned HTML5 user interface
- Native HTML front end, including CSS styles
- Animation and transition support now available for all pages and widgets
- New composite nodes, allowing the integration of node-systems into re-usable custom nodes
- Workflow optimizations to ensure the best efficiency
- Improved scripting language to further reduce production time
- Optimized performance due to 64 bit and web-based components
